K290AA

- ☒ 60 dBu contour for K290AA [KML](#)
- ☐ 60 dBu contour for K290AA (filled)

Notes and Comments:

- AM daytime groundwave contours are based on the use of the M3 conductivity map only. No measurement data is considered.
- AM critical hours and nighttime groundwave and skywave coverage contours are not available at this time.
- TV service contours are based on the use of the F(50,90) propagation curves and represent the noise-limited area of digital TV service.
- AM, FM, and TV Service Contours plotted here may differ from evaluations performed by the staff on individual proposals.
- For AM and FM, service does not stop at the contour. A station oftentimes can be heard at locations well beyond the service contour.
